

THE MOST FREQUENT OBSTACLES

WHEN YOU REGISTER A COMPANY (UAB) BY YOURSELF:

- **Preparation of the establishing documents.**

Preparation of the establishing documents requires specialized legal knowledge (what kind of documents are needed, how to prepare company's incorporation documents legally correct and so on). If person hasn't knowledge and experience in this sphere, he waists a lot of time for finding out what should be prepared, for attending public institutions and other bodies.

- **Choosing incorrect company names.**

Without knowing corporate naming rules, approved by state institutions of Republic of Lithuania, incorrect company names are chosen often.

- **Obtaining registration (legal) address.**

UAB, like every other company, must have a registered office. At this stage, a lot of time is wasted in obtaining official premises or finding institutions that provide services of registration (legal) address.

- **Opening company's current account at the bank.**

When establishing UAB – it is necessary to open the company's current account at the bank. This requires knowledge what documents must be submitted to the bank, as well as to prepare them and dedicate some extra time to visit the bank.

- **Arranging meeting at the notary.**

When UAB is registered in notarized manner – it takes time to arrange a meeting at the notary.
